

14th Asian Natural Products Conference

<Date> 2022/11/11 (Friday) 13:00-16:30 JST

<Venue>Online

<Language>English

<Outline>

The Asian Natural Products Conference (ANPC) started in 2020 as part of activities in the Functional Natural Products Module, Resource Recycling Cluster, Kyushu University Institute for Asian and Oceanian Studies (Q-AOS). At this conference, outstanding international researchers and students will share the latest findings on natural products and discuss their resource values from various viewpoints.

One of the objectives is to discuss the impact of Asian natural products on not only their utilization but also the environment and human life from interdisciplinary perspectives through online conferences. All studies provide greater or lesser extent hints for the progress of natural product research. We also welcome the introduction of research activities worldwide. We position this conference as a place for exchanging opinions with researchers in various fields, not limited to natural products research. In addition, we will seek collaboration not only in Asia but also in Europe, the Americas, and Africa. By integrating and continuously developing this international joint research, we hope to contribute to the SDGs. In particular, we also aim to develop business-academia cooperation research to realize a decarbonized society. This time, we will invite participants not only from Asian countries but also from Africa and South America and aim to build a network through exchanging ideas. We look forward to your participation.

<Details>

Time	Programs
13 : 10~14 : 10	Shen Fangming (China Agricultural University, China) Prof. Wahizatul Afzan Azmi (Universiti Malaysia Terengganu, Malaysia) Yenni Pintauli Pasaribu (Musamus University, Indonesia)
