

THE 1ST KOREA-JAPAN SEMINAR ON RURAL MULTIFUNCTIONALITY

4C-BASED NEW DEVELOPMENT PATHWAYS FOR PERI-URBAN RURAL AREAS

This seminar is supported by the 2026 Seoul National University OPEN WORLD (SOW) International Joint Research Support Program and the Kyushu University Institute for Asian and Oceanian Studies. It explores sustainable development pathways for peri-urban rural areas in Korea and Japan, both facing population decline and aging, from the perspective of Rural Multifunctional Transition.

The seminar presents initial findings from a joint study of Yangpyeong, Korea, and Itoshima, Japan, and examines the 4C principles of rural regeneration: Conservation, Cultivation, Community, and Creativity. It aims to develop evaluation approaches and policy directions applicable to both countries.

2026.11.03 [TUE]

Kyushu University Ito House Seminar Hall

< Peri-urban Rural Multifunctional Transition and Urban-Rural Linkage: A Korea-Japan Comparative Study >

Time	Program	Presenter
10:00-10:05	Opening Remarks	SON Yonghoon (Prof., Seoul Nat'l Univ.)
10:05-10:40	Presentation 1. Urban-Rural Linkage Model for Rural Regeneration through Multifunctional Transition	SON Yonghoon (Prof., Seoul Nat'l Univ.)
10:40-11:15	Presentation 2. Rural Spatial Characteristics and Urban-Rural Exchange Activities in Yangpyeong-gun	PARK Junho (Ph.D. Candidate, Seoul Nat'l Univ.)
11:15-11:50	Presentation 3. Perception and Enjoyment of Nature in Yangpyeong-gun and Itoshima City	KIM Doeun (Asst. Prof., Keimyung Univ.)
11:50-12:10	Break	
12:10-13:00	Discussion	TANAKA Toshinori (Assoc. Prof., Kyushu Univ.) AJISHI Yu (Asst. Prof., Kyushu Univ.)
